TONO-PEN AVIA®
Applanation Tonometer

*Getting a grip on rapid and accurate IOP measurements.*
Accurate – TONO-PEN AVIA is designed to help eliminate operator error and functions in any position, making it ideal for use with all of your patients, including those in beds or wheelchairs. Activated by the push of a button, the IOP measurement is displayed on two large, easy-to-read LCD screens. Patients will appreciate the quick and gentle measurement process.

Versatile – With its contemporary, award winning, ergonomic design, TONO-PEN AVIA is a very versatile addition to your practice. The LCD screens are positioned on either side of the TONO-PEN AVIA so both left and right handed users can visualize the measurement. The overmolded grip zones help stabilize the TONO-PEN AVIA in virtually all hand sizes. TONO-PEN AVIA is extremely portable and comfortable to hold, making it easy to take IOP measurements anywhere, on any patient.

Intelligent – TONO-PEN AVIA utilizes micro strain gauge technology and a 1.0 mm diameter transducer tip. The advanced microprocessor technology produces objective IOP measurements that are less influenced by operator bias than Goldmann tonometry. The average of 10 independent readings, combined with a statistical confidence index, ensures accurate, repeatable, and reliable tonometry results.

Applanation Tonometer – TONO-PEN AVIA features the same proven accuracy as the clinically trusted TONO-PEN XL, but with a more ergonomic design, four times longer lasting battery and larger LCD screens. Furthermore, the need for daily calibration has been eliminated, simplifying the measurement process. The proven reliability of Reichert’s applanation tonometers allows operators to take IOP measurements confidently anytime, anywhere, and in any position.

“The TONO-PEN AVIA was a joy to use. It is simple to operate, more ergonomic than previous models, and was by far the fastest tonometer I’ve used. Not only was it tolerated well by both children and adults in my practice, after using it for only one morning, our technicians didn’t want to give it back.”
– Ted Curtis, MD, The Children’s Hospital University of Colorado

“The TONO-PEN AVIA was fast, accurate and well-liked by everyone in our office.”
– Stephen De Souza, MD, Associated Retina Consultants of Arizona
